Relative to IB DOCKET No. 02-286

RECEIVED
OCT 23 2002
INSPECT

To Whom It May Concern:

During January of this year Global Crossing announced that they **were** filing for Chapter 11 bankruptcy protection. This bankruptcy, following in the steps of Enron, caused **severe** hardship among **employee/shareholders**, as it appears that our 401K plan containing Global Crossing stock is now virtually worthless. During this past month it **was** announced that a **re-structuring** plan has been approved by the bankruptcy judge, resulting in Hutchison Whampoa (Hong Kong & Singapore companies) having controlling interest in this new company. If this action is **approved** not only will **shareholders/employees** be affected by the actions of this company, but also the very security of this country. I am very concerned about the **"National Security Risk** that this sale **poses**. If **approved** by the Federal Communications Commission, the Chinese, **would** now **have** controlling interest in the largest private optic network in the world. This would result in the Chinese controlling **between** 20% and 25% of the fiber optic capacity coming into and going out of the United States. This, I feel, has the potential for a great security risk, **as** undoubtedly, military operations will be among the governmental agencies that will be using this capacity. I am as a result, asking that the FCC please **investigate** the potential problems that will occur as a result of this sale. If these concerns are found to have merit I ask that you **deny approval** of the license transfers, ultimately stopping the sale of Global Crossing. I would appreciate a response to this letter.

Thank you.
